Job Advert

Job Title: Senior Dev Ops Engineer (Cloud Platform) - Technology CSC - Police Staff - Counter Terrorism Policing HQ

Salary: The starting salary is £58,310, which includes allowances totalling £2,841.

The salary is broken down as £55,469 basic salary, which will increase annually until you reach the top of the scale £60,507. Plus, a location allowance of £1,841 and a non-pensionable allowance of £1,000.

Location: Birmingham

Counter Terrorism Policing (CTP) relies on a wide range of technologies. As a Senior DevOps Engineer for our Cloud Platforms, you will help to shape our new ways of working to support and develop national systems that support CTP operations to keep the country safe.

If you want to contribute to something that matters, this could be the role for you. Using your technical skills and experience you will help to support and develop our cloud platforms as part of a new team of DevOps engineers. You will also be a key player in embedding agile and DevOps ways of

working, across the team and other stakeholders, whilst supporting and improving business as usual operations alongside project delivery teams. With your skills, we can make sure that critical systems are available and secure so CTP can operate at its best.

Working flexibly, as required, from home, our operations centre located east of Birmingham (with easy access from the M6 and M42) or from our London based HQ. You'll be part of our Customer Service Centre (CSC) team providing technical support for all our national services. Please note this role may require a future on-call support commitment.

Day to day, you'll work on supporting live services running on our public cloud environments and developing functionality to support project teams' deliverables. We'll expect you to meet key standards, SLAs, best practice, and security procedures. Experience with agile delivery in technically diverse enterprise environments would be beneficial.

Job Description

As a skilled Senior DevOps Engineer, you'll possess a wide range of technical experience with your own areas of developed specialisms. An understanding of cloud platform technologies and security, preferably with Microsoft Azure/365 and AWS Platforms is essential. You should be technically creative and driven to continuously improve services. You should be comfortable explaining technical requirements to stakeholders who may not be technically literate and able to deputise for the Lead DevOps Engineer as required.

As this is a new team, we will be developing new ways of working and you should be keen to learn and develop both technical and supporting skills as required. Practical knowledge of infrastructure as code via Terraform would be beneficial as would any other relevant support or development experience.

This is a flexible role with home and office working available dependent on business needs.

There may be occasional travel to other UK sites for business purposes and overnight accommodation will be provided when required. We promote a positive work life balance but occasionally a flexible approach to working hours is essential due to the nature of the role.

Discover a fascinating role that is at the heart of protecting the UK public. In return, you can look forward to other benefits including generous annual leave, Civil Service pension arrangements, flexible working conditions, a

formal training plan and training options.

Key Responsibilities

- Transform technical requirements into an effective DevOps toolchain to enable product delivery.
- Ensure that deployment strategies for products are repeatable, scalable, and highly available.
- Have deep technical knowledge, providing support to operational and delivery teams and solving complex problems.
- Take a leading role in the development and operation of the cloud infrastructure:
- Provide project oversight to ensure standards are met.
- Work with developers and engineers to ensure that software development follows established processes and works as intended.
- Ensure personal and team workload is effectively managed, prioritised and issues are escalated to line management as necessary.
- Ensure adherence to required polices, standards, controls, and best practice.
- Create, maintain, and review technical documentation to ensure all services are maintained and knowledge is shared.
- Proactively monitor cloud environments to help prevent and resolve issues arising.
- Proactively drive continuous improvement across cloud services.
- Assist in mentoring and developing the team.
- Deputise for the Lead DevOps Engineer (Cloud Platform) as required.

Vetting

This post requires access to the most sensitive intelligence material on a daily basis. Applicants must hold or be prepared to undergo National Security Vetting (NSV) Security Check (enhanced) (SC(e)) level before taking up the post; with a willingness to undergo Developed Vetting (DV) once in post, if required.

Additionally, this material is of particular sensitivity to the UK and its distribution must be restricted to UK nationals. In approved circumstances dual nationals (of which one element is British) may also be granted access. However, in the event that potential conflicts of interest cannot be managed the post holder will not be able to see the intelligence material and will not be able to perform their duties. For the purpose of safeguarding national security and in line with Cabinet Office Policy, supported by Section 82(2) to (4) of the Police Reform Act (2002), applicants who do not hold or acquire Security Check (enhanced) (SC(e)) **OR** Developed Vetting (DV) clearance and meet the nationality requirements cannot be offered the post.

Confidentiality Agreement

Applicants should also be aware of the need to sign a confidentiality agreement on taking up the post.

Our Employee Commitments

Counter Terrorism Policing aims to create an inclusive and welcoming atmosphere and culture and an environment where all our people feel a strong sense of belonging and are able to reach their full potential. Where any group or individual can be and feel respected, supported and valued to fully participate and contribute to our mission of “Working to keep people safe from Terrorism”.

Inclusion, diversity and equality is at the front and centre of our approach to make the composition of Counter Terrorism Policing more representative of the communities we serve. As Counter Terrorism is rooted in Local Policing, to tackle today’s complex policing challenges, applications from across all communities are therefore essential and encouraged. Counter Terrorism Policing as a network is committed to ensuring that disabled people and those with long-term health conditions have the opportunities to fulfil their potential and realise their aspirations’.

Counter Terrorism Policing is committed to creating an inclusive working environment. We welcome and encourage applications from candidates who are seeking flexible working arrangements, including part time working or job share. In addition, this role has been reviewed following learning from work during the Covid pandemic and may be done in an agile manner. In the first instance, please contact the vacancy holder to discuss how such arrangements could be accommodated (where applicable).

How to apply

Click the apply now button below and start your career at the Met. Applications will be via a detailed CV and online application form.

Completed applications must be submitted by 23:55 on the 17th of October 2024.

www.metpolicecareers.co.uk

Disability Confident Statement

The Met is committed to being an equitable (fair and impartial) and inclusive employer for disabled people, striving to have a diverse and representative workforce at all levels. We encourage applications from people from the widest possible range of backgrounds, cultures and experiences. We particularly welcome applications from people with disabilities and long-term conditions, ethnic minority groups and women.

As a Disability Confident employer, the Met has committed to making disability equality part of our everyday practice. We ensure that people with disabilities and those with long term conditions have the opportunities to fulfil their potential and realise their aspirations.

The Met is committed to making reasonable adjustments to the recruitment process to ensure disabled applicants can perform at their best. If you need any reasonable adjustments or changes to the application and recruitment process, we ask that you include this information within your application form. All matters will be treated in strict confidence.

Please note, if you are applying for a police officer role or to become a police community support officer (PCSO) or designated detention officer (DDO), there is a minimum requirement that you must pass a job-related fitness test (JRFT) at point of entry. This does not apply to police staff roles. Find out more about police fitness standards.

Read our full disability confidence statement.

Overview

We are on the cusp of a new frontier in which machine learning and artificial intelligence are transforming scientific discovery. We seek to drive major advances in sciences with machine learning, with a focus on 'fifth paradigm' scenarios. Through these advances, we aim to empower real-world impact on some of the most pressing problems facing society including climate change, green energy, sustainable materials, and the discovery of new drugs.

AI4Science is a new global team in Microsoft Research focusing on the opportunity to transform scientific modelling and discovery through large-scale deep learning. We aim to advance this frontier and to drive real-world impact at a global scale. The AI4Science team encompasses multiple disciplines across machine learning, engineering, and the natural sciences and spans several geographical sites in Europe, Asia, and the US.

The field of machine learning has evolved significantly in recent years, with many of the most impactful contributions coming from larger teams of people collaborating closely on well-defined and challenging goals. Furthermore, AI4Science in particular requires a combination of machine learning, engineering, and natural sciences, which again emphasizes the importance of collaboration and teamwork.

We are seeking a highly motivated and experienced researcher with expertise in machine learning.

Qualifications

Required Qualifications:

- Master's degree or equivalent work experience in deep learning and reinforce learning, with publications in top ML conferences, e.g., NeurIPS, ICLR, ICML.
- Passion for science related problems, including but not limited to, materials science, chemistry, physics, and biology.
- Proficiency in Python and relevant ML libraries (e.g., PyTorch).
- Experience with transformer-based models (e.g., GPT, Llama).
- Fluency in spoken and written English.
- Demonstrable capabilities in doing solid research in machine learning evidenced by high quality publications and/or a track record of innovation.
- Candidates must be able to collaborate effectively with other researchers. We are particularly interested in the candidates who can work across disciplinary

boundaries

Preferred Qualifications:

- Good chemistry, physics, biology, and medicine implementation skills and mathematical background are good to have but not a must.
- Candidates must be able to collaborate effectively with other researchers. We are particularly interested in the candidates who can work across disciplinary boundaries.

#Research #AI4Science

Responsibilities

- Perform cutting-edge research in collaboration with other researchers and engineers.
- Passion and dedication in machine learning for science, and your commitment to doing world-class research.
  Stay current with the latest trends, research, and developments in AI and machine learning to ensure our systems remain at the forefront of innovation.

MO19 Specialist Firearms Command - Firearms Enquiry Team Researcher Band E

Location: Marlowe House, Sidcup

This is an exciting time to be working as a Firearms Enquiry Team Researcher for the Metropolitan Police Service. The Firearms Enquiry Team is responsible for ensuring the safe and effective licensing of all legally held firearms, shotguns and explosives in London. As a Researcher this is an excellent opportunity for you to get involved with making London the safest global city in a time of unprecedented change within the UK's largest Police Service.

The successful candidate will be expected to complete training as a researcher bespoke to the Firearms Enquiry Team role, drawing on existing experience and skillset.

This position involves vetting and risk assessing members of the public who wish to possess firearms and explosives. It is critical in minimising risk to the public and the reputation of the Metropolitan Police. The researcher is responsible for assessing the suitability of applicants to possess shotguns/firearms by researching various MPS and National databases. The role holder will have regular interaction with SCO7, 8, 35 and 36. Demand is high - we process approximately 750 files a month, each requiring vetting. This role will fit into a small team dedicated to this work.

Key Responsibilities

- The effective and expedient risk management of matters relating to firearms licensing applications, the monitoring of all certificated individuals, registered dealers and gun clubs.
- Successful candidates will be responsible for the mitigation of risk by identifying risk, assessing risk, briefing officers and supervisors of identified risks.
- The quick time response to firearm licensing queries from specialist MPS units.
- Working in partnership with MPS specialist departments in the development and implementation of the future intelligence search platform and risk procedures (DAF and Super DAF).

Research Staff will also been trained in the functionality of the Administration Team and be expected to flex across when resourcing requires. Administration staff role will include the following duties.

- The effective and expedient administration of matters relating to firearms licensing.

- Successful applicants will be responsible for the initial processing of firearms applications - rejecting if necessary requirements are not met, dealing with email enquiries from members of the public regarding their shotgun / firearms / explosive licenses, updating the National Firearms Licensing Management database, printing and posting licenses and filing of applications upon completion. The system is now digitalised and computer literacy is essential with all Firearms licensing managed on CONNECT PMP's.
- The successful applicants will support the sergeants in the management of risk posed by firearm/shotgun license holders. This may include identifying risk contained in GP letters.

Any questions please email Insp Pete Court or PS Stuart Wiltshire

Does this sound like you? If yes, start your application now.

If you have any queries in respect of this opportunity, or need support in applying, please contact the Met's Recruitment Team at Enquiries.PoliceJobs@sscl.gse.gov.uk or by telephone to 01633 632500. The team are available Monday to Friday, 8:00am to 10:00pm (excluding Bank Holidays).

We view diversity as fundamental to our success. To tackle today's complex policing challenges, we need a workforce made up from all of London's communities. Applications from across the community are therefore essential.

As a Disability Confident Committed Employer the Met have committed to ensuring that disabled people and those with long term health conditions have the opportunities to fulfil their potential and realise their aspirations.

Essential For The Role

Essential Criteria

- An ability to manage and prioritise own workload.
- Good time management.
- Use specialist knowledge and skills to support the work.
- Excellent IT skills including an ability to use current IT systems employed by the Met Police including CONNECT, Box and Excel.

Desirable Criteria (Research role)

- In-depth knowledge of CONNECT, IIP, CRIS, Crimint, Merlin, and CAD
- Ability to complete Dynamic Risk assessments in relation to intel obtained via Police Indices

Reports To

Police Sergeant Firearms Enquiry Team

Full-Time

Overview

Are you driven by a passion for business growth and the power and productivity driven by Microsoft’s Modern Work Product portfolio, inclusive of Microsoft 365, and its ability to transform how work gets done for millions of users every day? We are seeking an experienced and passionate individual to build and lead a team of Go-to-Market Managers to design, drive and land the go-to-market strategy for our Modern Work business across the Americas (LATAM, US and Canada).

As part of the Americas Sales Enablement & Operations (SE&O) organization we operate with the goal of engineering scale and consistency in many areas, including Go to Market strategy, operations, customer and partner experience and core business leadership. The Sales Enablement & Operations team plays an essential role in translating Microsoft’s worldwide commercial strategy to a regional execution plan and driving operational excellence.

The Director, Modern Work Go-to-Market is a highly strategic, leadership-level position that is responsible for supporting our sales community and is accountable for connecting Field Sales, Partner, marketing and corporate teams to learn, share, create and leverage best practices for landing our strategic priorities. We are focused on enabling field sellers with marketing resources, driving business outcomes and landing of our GTM across all commercial segments (SMB, Mid-Market, Enterprise, and Public Sector) across the Americas region.

Qualifications

Required/Minimum Qualifications
· 8+ years marketing strategy, business planning, sales enablement, business development, technical pre-sales, or related work experience.

Additional or Preferred Qualifications
· 12+ years marketing strategy, business planning, sales enablement, business development, technical pre-sales, or related work experience AND Bachelor's Degree in Business, Marketing, Computer Science, or related field
o OR equivalent experience.
· 8+ years experience managing and expanding a product/solution portfolio and driving demand generation and pipeline acceleration within a complex (e.g., multinational or matrixed) organization.

· 5+ years people management experience.

Field Product Marketing M5 - The typical base pay range for this role across Canada is CAD $121,800 - CAD $219,100 per year.

Find additional pay information here:
https://careers.microsoft.com/v2/global/en/canada-pay-information.html

Microsoft will accept applications for the role until October 4, 2024

Responsibilities

Field Enablement

- Ensures Business Group (BG) Leads and field communities have the leadership and enablement needed to run the business locally.
- Serves as the primary orchestrator between corporate and the field and ensures field and corporate leadership are aligned on business results and actions to take.
- Provides thought leadership and ensures our SE&O teams can equip channels and sellers with the knowledge and resources to sell, while identifying gaps and opportunities to affect business outcomes, including revenue, customer adoption and market share.

Go-to-Market (GTM) Strategy, Planning, and Delivery

- Drives rigor in definition and orchestration of strategic go-to-market (GTM) plans inclusive of marketing, field, consulting, customer success, and partner functions that support the One Microsoft approach to overall business strategy and execution.
- Influences and impacts strategy at the worldwide level. Enables collaboration across relevant partners and stakeholders and leverages expertise in strategic cross-product/aggregate business metrics to drive insights and impact GTM strategy and delivery.
- Facilitates and drives engagement across a complex stakeholder map to drive the product marketing growth strategy and drives impact through correction of error initiatives as required. Advises and enables functional teams in understanding and executing market strategy and customer segmentation strategy plans.

Product Advocacy

- Leverages credibility and expertise to act as the executive-level product/technical advocate and evangelist, providing thought leadership and driving impact across solution areas and/or countries.

Business Development

- Drives area/subsidiary leadership through revealing and pursuing long-range, white-space growth opportunities, marketing strategies and investment plans.
- Drives regular engagements with relevant executive stakeholders to develop and operationalize strategies and oversee implementation of cross-market solutions that drive strategic impact and increased market share, in line with area-specific service requirements (e.g., local regulatory compliance/programs).

Business Management

- Develops and orchestrates the execution of business strategy. Tracks the efficacy of plans across solution areas/countries to drive long-term sustainable growth for the business. Accepts end-to-end accountability for revenue, scorecard metrics, and key performance indicators (KPIs) for the business.
- Defines and leads the execution of rhythm of the business (ROB) cadence and metrics to gather feedback and enable field performance. Leads regular cadence of connections with corporate (e.g., global sales, marketing, and operations, the business group, engineering) to execute strategic planning.
- Acts as the executive-facing representative from the field, sharing insights back to the business (e.g., business group, finance, engineering teams) on execution, performance, and trends across areas/subsidiaries. Consolidates insights to succinctly summarize the business for senior leadership. Utilizes expertise in key aspects of the business and rigor of execution to drive contributions to worldwide business performance.

People Management

- Delivers success through empowerment and accountability by modeling, coaching, and caring.

Other

- Embody our culture and values

Benefits/perks listed below may vary depending on the nature of your employment with Microsoft and the country where you work.

Industry leading healthcare

Educational resources

- Discounts on products and services
- Savings and investments
- Maternity and paternity leave
- Generous time away
- Giving programs
- Opportunities to network and connect

Microsoft is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to age, ancestry, citizenship, color, family or medical care leave, gender identity or expression, genetic information, immigration status, marital status, medical condition, national origin, physical or mental disability, political affiliation, protected veteran or military status, race, ethnicity, religion, sex (including pregnancy), sexual orientation, or any other characteristic protected by applicable local laws, regulations and ordinances. If you need assistance and/or a reasonable accommodation due to a disability during the application process, read more about requesting accommodations.

Job Title: Motor Vehicle Technician

Salary: The starting salary is £43,227, which includes allowances totalling £2,841.

The salary is broken down as £40,386, basic salary, which will increase annually until you reach the top of the scale £45,615. Plus, a location allowance of £1,841 and a non-pensionable allowance of £1,000.

Location: Various Locations (Belvedere, Heathrow, Rainham and Wimbledon)

Over 1,000 pedal cycles. 25 marine vessels. More than 5,000 vehicles in total. Our fleet is one of the biggest in the country and tackles some of the most arduous and challenging conditions around. We now need a capable Motor Vehicle Technician to help us service and maintain our vehicles day to day. Join us – and make sure every car, motorbike and bicycle is in sound condition and ready to hit the streets.

Vehicles are a workplace for our officers and staff, carrying sophisticated equipment, or providing a safe environment for transporting the public and prisoners. To keep them in the best possible state, we have Fleet Services, who are responsible for all aspects of fleet lifecycle management.

As part of the team, you'll take on a range of fleet servicing tasks, supporting technical supervisors. It means you'll be checking the condition of vehicle components, maintaining hi-tech test equipment, and inspecting and road testing vehicles.

One of your most important jobs will be maintaining front line response, covert and specialist fleet vehicles. You'll perform repairs and services for

these vehicles in our Fleet Services specialist workshops, which are located across London.

Interested? To join us, you must be qualified to IMI NVQ or City and Guilds Level 3 in light/heavy passenger vehicle maintenance and repair (or equivalent). A full UK driving licence is of course, essential, along with a natural talent for teamwork.

In return for your efforts, you can expect a competitive salary, a Civil Service pension, excellent career development, and a highly rewarding role.

Our operational policing fleet comprises of over 5000 vehicles, 1000 pedal cycles and 25 marine vessels. Vehicles are a workplace for our officers and staff, carrying sophisticated equipment for operational policing, or providing a safe environment for the transport of the public and prisoners. By their very nature, vehicles are often used in the most arduous and challenging conditions.

Fleet Services are responsible for all aspects of fleet lifecycle management to the Met, including the service, maintenance and repair of police vehicles and vessels.

The Role

Dependent upon your location preference and vacancy availability the primary role of a motor vehicle technician is to ensure that vehicles are serviced and maintained promptly and effectively and are ready for essential police operations. The role holder will:

- maintain front line response, covert and specialist fleet within Fleet Services specialist workshops by providing efficient scheduled and unscheduled maintenance repairs on the vehicle fleet.
- reduce vehicle maintenance costs and maximise fleet availability by ensuring repairs on the vehicle fleet are timely and necessary.
- support the technical supervisors to maintain the delivery of an effective and efficient service.
- accurately determine the serviceability of all vehicle components, mechanical, electrical, and hydraulic, using industry recognised tools and equipment
- visually inspect and road test vehicles, interpreting feedback from the vehicle’s correct function
- diagnose electrical faults accurately, using high and low technology electrical test equipment to ensure they achieve or exceed vehicle manufacturer's standards.
- accurately record obtained measurements and data on completed work, compiling technical reports where necessary
- maintain high technology test equipment to configure and reconfigure the

appropriate system correctly.
- accurately follow the end-to-end process for each manufacturer’s warranty process
- read, interpret, and analyse wiring diagrams, making use of interactive guides available from various manufacturer's diagnostic equipment and web-based mediums.
- follow multiple manufacturers repair instructions, specific methods, and techniques.
- take responsibility for personal development and keep up to date with relevant standards and legislation.
- continuously understand wider Met activity and decision making to assess potential impact on local delivery.
- transfer knowledge and skills to apprentices and less technical staff.

The additional specific training we provide.

- additional police specialist warning equipment and communication systems
- high technology surveillance equipment
- specialist vehicle conversion

How to apply

Click the apply now button below and start your career at the Met. Applications will be via a detailed CV, Personal Statement, and online application form. Your personal statement should outline why you are interested in the role and how your skills and experience demonstrate your suitability for the role. (NB. Please do not attach 2 copies of your CV).

Completed applications must be submitted by 23:55 on the 9th of January 2025.

Essential For The Role

Essential For The Role, e.g. qualifications, licenses, languages, training

Qualification Requirements

- IMI NVQ Level 3, City & Guilds Level 3 in vehicle service maintenance and repair or equivalent.
- Full UK Driving Licence.

Disability Confident Statement

The Met is committed to being an equitable (fair and impartial) and inclusive employer for disabled people, striving to have a diverse and representative

workforce at all levels. We encourage applications from people from the widest possible range of backgrounds, cultures and experiences. We particularly welcome applications from people with disabilities and long-term conditions, ethnic minority groups and women.

As a Disability Confident employer, the Met has committed to making disability equality part of our everyday practice. We ensure that people with disabilities and those with long term conditions have the opportunities to fulfil their potential and realise their aspirations.

The Met is committed to making reasonable adjustments to the recruitment process to ensure disabled applicants can perform at their best. If you need any reasonable adjustments or changes to the application and recruitment process, we ask that you include this information within your application form. All matters will be treated in strict confidence.

Please note, if you are applying for a police officer role or to become a police community support officer (PCSO) or designated detention officer (DDO), there is a minimum requirement that you must pass a job-related fitness test (JRFT) at point of entry. This does not apply to police staff roles. Find out more about police fitness standards.

Read our full disability confidence statement.

Overview

As a Data Center Technician (DCT), you will develop an understanding of standard processes and procedures for preparing, installing, performing diagnostics, troubleshooting, replacing, and/or decommissioning equipment under the guidance of more experienced Data Center colleagues. This opportunity will allow you to develop an understanding of our Data Center environment, familiarize yourself with security and data management procedures, and accelerate your career growth in the process.

Microsoft’s Cloud Operations & Innovation (CO+I) is the engine that powers our cloud services. As a CO+I DCT, you will perform a key role in delivering the core infrastructure and foundational technologies for Microsoft's online services including Bing, Office 365, Xbox, OneDrive, and the Microsoft Azure platform. As a group, CO+I is focused on the personal and professional development of all employees and offers training and growth opportunities including Career Rotation Programs, Diversity & Inclusion trainings and events, and professional certifications.

Our infrastructure is comprised of a large global portfolio of more than 200 Data Centers in 32 countries and millions of servers. Our foundation is built upon and managed by a team of subject matter experts working to support services for more than 1 billion customers and 20 million businesses in over 90 countries worldwide.

With environmental sustainability and optimization at the forefront of our data center design and operations, we continue to grow and evolve as we meet the ever-changing business demands that hold Microsoft as a world-class cloud provider.

Microsoft's mission is to empower every person and every organization on the planet to achieve more. As employees we come together with a growth mindset, innovate to empower others, and collaborate to realize our shared goals. Each day we build on our values of respect, integrity, and accountability to create a culture of inclusion where everyone can thrive at work and beyond.

Qualifications

Required Qualifications

- High school diploma, GED, or equivalent and basic knowledge of computer hardware and components
    - OR equivalent experience.
- Ability to work 12 hours shifts, including shift assignments during non-standard business hours that may include evening, weekends, and/or holidays.

Other Requirements:

Ability to meet Microsoft, customer and/or government security screening requirements are required for this role. These requirements include, but are not limited to the following specialized security screenings:

- **Microsoft Cloud Background Check:** This position will be required to pass the Microsoft Cloud background check upon hire/transfer and every two years thereafter.
- **Citizenship Verification:** This position requires verification of citizenship due to citizenship-based legal restrictions. Specifically, this position supports United States federal, state, and/orlocal governmentagency customers and is subject to certain citizenship-based restrictions where required or permitted by applicable law. To meet this legal requirement, and as a condition of employment, the successful candidate's citizenship will be verified with a validpassport.
- **Criminal Justice Information Services:** This position requires passing a background check conducted through the CJIS criminal justice information system by authorized local, state, and/or federal agencies and across multiple states. This role requires candidates to maintain CJIS screening eligibility.

Preferred Qualifications:

- High school diploma, GED, or equivalent and basic knowledge of computer hardware and components AND 1+ year(s) experience supporting IT equipment or related technology

- OR equivalent experience.

Data Center Technicians ATR-B - The typical base pay range for this role across the U.S. is USD $21.88 - $35.91 per hour. There is a different range applicable to specific work locations, within the San Francisco Bay area and New York City metropolitan area, and the base pay range for this role in those locations is USD $30.58 - $39.86 per hour.

Data Center Technicians ATR-C - The typical base pay range for this role across the U.S. is USD $26.39 - $46.83 per hour. There is a different range applicable to specific work locations, within the San Francisco Bay area and New York City metropolitan area, and the base pay range for this role in those locations is USD $37.21 - $51.73 per hour.

Certain roles may be eligible for benefits and other compensation. Find additional benefits and pay information here: https://careers.microsoft.com/us/en/us-corporate-pay

Microsoft will accept applications and processes offers for these roles on an ongoing basis.

Responsibilities

Datacenter Operations

- Receives guidance and supervision to develop an understanding of standard processes and procedures for preparing, installing, performing diagnostics, troubleshooting, replacing, and/or decommissioning IT datacenter technology(ies) and equipment. Develops and acquires a fundamental understanding of the functions of, and interactions between cabling infrastructure, network, server, and storage equipment.
- Reviews Process Change Notifications (PCNs) and develops an understanding of the impact to work execution and awareness to changes within their area of work and/or the work of others. Asks questions when they do not have required information and may provide feedback on changes to processes to experienced technicians and/or direct-line management.
- Complies with Data Center business unit policies, procedures, and deadlines with guidance from experienced technicians and/or direct-line management. Escalates issues related to compliance or operational assurance activities to direct-line management.
- Completes assigned tickets efficiently and in alignment with relevant Key

Performance Indicators (KPIs) per task type with guidance from experienced technicians. Seeks guidance from more experienced technicians on challenging or complex tickets.

Service Delivery

- Develops an understanding of effective execution order strategy(ies) for assigned tasks with assistance from experienced technicians or direct-line management. Prepares, stages, sets up, and performs basic startups and shutdowns for hardware (e.g., racks, hard drives, switches) according to specific written instructions provided via checklists, guides, standard processes, emails, guidance from other technicians, and/or direction from management. May perform tasks in tandem with other technicians to comply with procedures and safety requirements.
- Learns about post-execution verification of grounding, staging, labeling, and cabling to align with all safety protocols, deployment standards, and planned Network Design Templates (NDTs). Learns about errors in deployment standards or Network Design Templates (NDTs) and escalates to relevant technicians or specialists to coordinate corrections as needed.
- Performs basic diagnostics and troubleshooting with guidance from experienced technicians and/or via standard procedures to identify the cause(s) of technical issues and replace faulty components in network, storage, or server equipment with zero-to-minimal customer and/or business disruption. Develops awareness of conditions, circumstances, and scenarios which may reflect significant customer or business impact within the Data Center environment.
- Follows procedures to immediately communicate, report, and escalate data center technical or safety related incidents to direct-line management. May participate in bridge calls to provide details on incident status and executes on-site follow-up actions as directed if necessary.
- Directly performs decommissions, simple changes (e.g., memory upgrades, OS rebuilds) and refreshes of infrastructure cabling, network, storage, and server equipment, following standard procedures whilst seeking clarification and guidance from more experienced technicians as needed. Processes data-bearing devices (DBDs) for destruction or confirms any-and-all such devices (e.g. hard-drives, solid-state drives, flash cards, etc.) contained within network, storage, or server equipment has been identified for eradication or destruction with guidance.

Managing Service

- Escalates and/or seeks guidance from experienced technicians or direct-line management regarding client interactions.
- Maintains an awareness of Key Performance Indicators (KPIs) through reporting dashboards, systems, for personal monthly performance discussions as needed.
- Develops an understanding of cross-functional Data Center processes to support partnerships with internal and external stakeholders.
- Completes required training aligned to job focus areas and workloads (i.e., Break fix, Deployment, Simple Change, Decommission, IT Critical

Environment) in a timely manner per direct-line management assignment(s). Observes more experienced technicians to gain hands-on experience and relevant on-the-job training (OJT). May complete additional or supplemental training to obtain or maintain relevant industry or technical certifications.

Datacenter Work Environment

- Participates in daily safety briefings. Completes required Environmental & Health Safety (EHS) training, complies with safety procedures (e.g., equipment use, lifting, electrical hazards, ladder/rolling stair use), completes required Task Hazard Analysis (THAs), and uses appropriate equipment and Personal Protective Equipment (PPE) for assigned tasks. Adheres to and promotes a culture of safety, taking proactive action to alert others of safety concerns, near-misses, and/or incidents. Participates in the regular cadence of proactive safety observation reporting processes and systems.
- Completes required security and data management training while complying with security and data management procedures/policies with guidance from other technicians. May escort third party vendors or IT support on-premises at data centers or network sites. Appropriately takes action and reports physical security access concerns and/or incidents to direct-line management or established reporting methods.
- Contributes to a positive and effective team environment by sharing information with other shifts or technician teams, contributing in regular team meetings, asking questions, and partnering with other shifts of technician teams to complete smooth transition and effective handover of ticketed work. Encourages providing and responding to feedback received on ways to work more effectively or enhance efficiency within their team and adopts best practices shared within-and-across shifts or technician teams.

Physical Requirements (Applies to but is not limited to US-based Data Center roles)

- Occasional climbing of ladders.
- Frequent climbing of stairs and/or ramps.
- Prolonged standing.
- Occasional lifting 50lbs. / 22.5kg.
- Occasional push or pull 50-75lbs. / 22.5-34kg. with assistive device.
- *Normal visual acuity (near, far and peripheral with correction).
- *Normal color vision for electrical work.
- *Normal is defined via standard medical terms and applicable criteria.

Other

- Embody our culture and values.

Benefits/perks listed below may vary depending on the nature of your employment with Microsoft and the country where you work.

- Industry leading healthcare
- Educational resources
- Discounts on products and services
- Savings and investments
- Maternity and paternity leave
- Generous time away
- Giving programs

Job Advert

Job Title

Modern Slavery and Child Exploitation (MSCE) Investigations Detective Sergeant

Location

The vacancy is for a Detective Sergeant position on one of the East Investigation Teams based at Cam Road, Stratford.

Number of Vacancies

There is 1 vacancy.

Hours/Shift Pattern

Flexible working is not a barrier to a specialist role. Specialist Crime are working closely with Project Balance, so flexibility is accessible to all. We welcome applications from officers who need to work flexibly, whether part time, compressed hours or other.

MSCE teams work 1 in 5 weekends. As a DS you will be expected to work a

minimum of 1 in 10 weekends.

There is currently no on-call requirement.

The Role

The Modern Slavery and Child Exploitation (MSCE) Investigation Teams Unit proactively and reactively target the most harmful international Organised Crime Groups (OCGs) who traffic people internationally for the purpose of labour, sexual or criminal exploitation.

The MSCE Investigation Teams also proactively target domestic OCGs and prolific offenders who exploit children either criminally (CCE) or sexually (CSE).

Due to the degree of sexual and criminal exploitation taking place in London, the MSCE Unit is at the forefront of dealing with violence against women and children.

Additionally, the MSCE Investigation Teams increasingly investigate OCGs involved in Organised Immigration Crime - people smuggling into the UK via small boat, ferry or lorry.

MSCE officers work as a team to utilise a diverse range of covert and overt tactics to conduct complex international proactive and reactive investigations. This is an excellent opportunity to join a unique unit that combines covert policing with safeguarding some of London's most vulnerable victims and securing convictions against the worst offenders.

It is an exciting time to join the unit as modern slavery and exploitation investigations are an area of growth, increased resource and research; with the unit expanding into investigating Organise Immigration Crime. The NCA estimates there are thousands of victims of modern slavery and human trafficking in the UK and, as the UK's premier modern slavery unit, MSCE bring to bear the full range of the Met's resources to meet this challenge.

Successful candidates will supervise a highly motivated, highly professional, diverse team to achieve these objectives.

<u>Then the role:</u>

As a Detective Sergeant you will work as Supervisor on 1 of the 5

Investigation Teams based at Cam Road, Stratford.

The majority of MSCE investigations are significantly complex enough to require a Senior Investigating Officer (SIO) and Investigating Officer (IO) who you will report to whilst line managing Detective Constables.

As a DS you will supervise the OIC's and Investigators who will have various roles within the complex investigations including:

- Case officers
- Disclosure Officers
- Exhibits Officers
- Victim Liaison Officers
- Intel Officers
- Digital Media Officers

You will participate in a diverse range of covert policing tactics, warrant planning/executions and subsequent reactive investigations. You will participate in international joint investigations which may involve optional travel abroad.

This is a role that will suit a diverse range of officers as each investigation requires a varied range of skills and experience. Therefore we welcome applications from officers with either strong proactive and/or reactive investigative experience.

We also welcome applications from people who have never worked within Specialist Crime before and from people who do not possess all of the desirable criteria.

What can we offer in return?

- Job satisfaction from rescuing victims from slavery and exploitation and bring associated offenders to justice
- Gaining experience in investigating Serious and Organised Crime
- Gaining the skills and experience of investigating Modern Slavery including attending a 4 day Modern Slavery course
- Experience in working with law enforcement agencies and partners across the UK and abroad including opportunities international travel
- Opportunities to undertake external academic study

Statement of Expectation

Due to the operational demands of SC, please be aware that some of the

courses which you may be offered attract a tenure period. This will be confirmed prior to the acceptance of the course once posted to SC. The tenure will start following the successful completion of the course and it is the expectation that normally the officer or staff member will be able to commit to the tenure, as a minimum. Within this role there is an expectation that you will remain on the unit for a minimum of 12 months and complete certain courses as it is essential for the role, these may attract a tenure from completion. A copy of all the courses that are currently subject to tenure can be found via the following link:
https://mps.ent.box.com/folder/153536711384?s=9dnbo7dlu5u5fgsh01shr00potarf5cj

Additional Information

The Application Form will ask you four (4) questions focused on investigative. They are designed to measure the skills that are essential to the Detective Sergeant role within Specialist Crime and your contribution to the MPS key priorities within the New Met for London plan. When considering your evidence for these questions the Assessors will be looking for details shown below:

- We Deliver Support and Inspire (Level 2) **Q1: Investigative experience- Please provide an example of when you have supervised a serious and complex crime that resulted in a positive outcome?**
- We take Ownership (Level 2) **Q2: please provide an example of when you have utilised intelligence to either reduce violence, safeguard the vulnerable or deal with serious criminality? What was the outcome?**
- We analyse critically (Level 2) **Q3 - Please provide an example where you have used and analysed a range of data in support of a proactive or reactive investigation?**
- Professionalism - **Q4 - Please provide an example where you have cultivated and maintained a positive relationship with internal or external partners within an investigation.**

SC Employee Pledge

Specialist Crime and Central Specialist Crime is dedicated to being the Business Group of choice for all people by being a diverse and cohesive place of work, where every person is accepted for who they are. We believe everyone should be able to bring their true self to work, so we are working to enhance a culture where there is a strong sense of belonging. A supportive environment where everyone experiences respect, encouragement and appreciation to reach their full potential and contribute

towards the significant and positive impact we have on Serious Organised Crime. Specialist Crime and Central Specialist Crime recognise that a diverse and representative team is critical to our success, so we aim to become truly representative of the Communities we serve. We invite and encourage you to join us by submitting an application, so we can continue to build on a culture of inclusivity and increase cognitive diversity.

We view diversity as fundamental to our success. To tackle today's complex policing challenges, we need a workforce made up from all of London's communities. Applications from across the community are therefore essential.

As a Disability Confident Committed Employer, the Met have committed to ensuring that disabled people and those with long-term health conditions have the opportunities to fulfil their potential and realise their aspirations.

DS Owen – Organ Harvesting:

DS Owen on BBC Sounds – File On 4 – The Organ Harvesters

For further information please contact DI Jim Madden via aware or 07384237505.

Essential For The Role

Essential Skills and Experience

- Substantive Sergeants (having completed WBA)
- Experience in conducting serious and complex investigations
- Ability to supervise a small team
- Ability to engage with internal and external partners
- If applying from BCU then clear of 12month tenure
- MV/SC and CVGS vetting or the willingness to undertake vetting

Desirable Skills and Experience

MSCE investigations require a diverse range of skills and experience. Applicants are not expected to have any of the skills and experience listed but they are desirable.

- Police driver
- Surveillance aware/trained
- Proactive/covert experience or training
- Experience/training in phone examination and communications data (CSAS, XRY)
- Advanced Disclosure/Exhibits
- Advanced suspect and witness interview

Overview

Security is foundational to all product and service offerings from Microsoft. We need an experienced security professional with a deep-rooted passion in identifying security issues before they impact millions of users.

The Bing Offensive Security Team is part of Microsoft AI and leads offensive security operations, especially code reviews, Penetration Testing and variant hunting across services with globally distributed engineering teams.

Our team is looking for a Senior Security Technical Program Manager, who will help shape the offensive security program to consistently apply offensive tactics and remediation measures that improve both our security engagements as well as tooling. This position offers an unparalleled experience in utilizing technical expertise from penetration testing and security to solve operational problems and problems of scale across teams.

The candidate should possess experience with online services and penetration testing (including code audits, SAST/DAST, and critical thinking) and have a solid grasp of service security fundamentals, proficient computer science skills, and committed security program management skills.

Microsoft’s mission is to empower every person and every organization on the planet to achieve more. As employees, we come together with a growth mindset, innovate to empower others, and collaborate to realize our shared goals. Each day we build on our values of respect, integrity, and accountability to create a culture of inclusion where everyone can thrive at work and beyond.

In alignment with our Microsoft values, we are committed to cultivating an inclusive work environment for all employees to positively impact our culture every day.

Qualifications

Required Qualifications

- Bachelor's Degree AND 4+ years experience in engineering, product/technical program management, data analysis, or product development
    - OR equivalent experience.
- 2+ years experience managing cross-functional and/or cross-team projects.
- 4+ years of experience with Security threat modeling.
- 4+ years of experience conducting security assessments on Web Applications, Mobile Applications, and Cloud Services running on variety of operating systems including containers.

Preferred Qualifications

- 2+ years of experience driving penetration testing or Red Team engagement
- 1+ year(s) experience reading and/or writing code (e.g., sample documentation, product demos).
- Experience in cybersecurity assurance and program management, preferably including online service development.
- Knowledge of and the ability to carry out the process of planning, organizing, and managing tasks and resources to accomplish a well-defined objective.
- Experience with defining and tracking OKRs and KPIs to measure program performance.
- Proficient communication and collaboration skills, with the ability to effectively interact with stakeholders at all levels of the organization.
- Experience with application security standards such as OWASP ASVS/Top 10, CWE 25.
- Experience with common security libraries, security controls, and common security flaws.
- Outstanding collaboration and partnership skills, with proven ability to drive results across teams.
- Coding skills in one or more general purpose scripting languages.
- Familiarity with web proxies such as Burp, OWASP ZAP or Fiddler.
- Familiarity with using Offensive Security distributions such as Kali, BlackArch and BackBox.

- Development or scripting experience. PowerShell, Bash, Rust, Go, GraphQL, REST.
- Demonstrated experience in successfully designing, delivering, and iterating on complex projects with a diverse set of stakeholders.

Technical Program Management IC4 - The typical base pay range for this role across the U.S. is USD $117,200 - $229,200 per year.

There is a different range applicable to specific work locations, within the San Francisco Bay area and New York City metropolitan area, and the base pay range for this role in those locations is USD $153,600 - $250,200 per year.

Certain roles may be eligible for benefits and other compensation. Find additional benefits and pay information here: https://careers.microsoft.com/us/en/us-corporate-pay

Microsoft will accept applications for the role until September 13, 2024.

MO19 Specialist Firearms Command - Tactical Firearms Commander Detective Inspector (UNARMED)

Location: Lambeth SOR, Pratt Walk, SE1

Rank: Detective Inspector and those Detective Sergeants on the promotion select list.

Applications are invited to join MO19 as a Detective Inspector in the role of Tactical Firearms Commander (TFC). The posting is located at Lambeth SOR working on the MO19 Specialist Firearms Command Pod. Selected inspectors undergo an Initial Tactical Firearms Commander Course (ITFC) as a prerequisite. This is then followed by a fully supported mentorship prior to accreditation.

The TFC role is exceptionally rewarding and offers a variety of challenges largely unparalleled elsewhere, dealing with spontaneous firearms operations supporting BCUs, and Specialist Crime and Counter Terrorism operations. As a TFC you will command operations and work alongside Armed Surveillance, ARVs and CTSFOs and manage high risk operations. You will review all CADs sent to MO19 making an assessment on whether

the call requires firearms deployment (‘declared’).

We are looking for applicants with sound decision making and leadership skills. Absolutely no experience of firearms is necessary. The training given to selected applicants provide the base required to begin working as Metro Alpha (MxA) in the company of a dedicated mentor. The vast majority of the current pool of TFCs are from non-firearms backgrounds.

The role is an unarmed role.

Training will start with the ITFC Course at MPSTC. This is an 8-day course with accommodation supplied as required.

Development for TFCs include a CADRE TFC Course allowing further training in the craft with successful candidates commanding pre-planned firearms operations upon completion of supervised accreditation. These operations are often planned from FARs supplied from BCU/OCU/SC. The next level of dedicated TFC is a Specialist TFC (STFC). STFCs command high risk CT and kidnap operations often opening a separate command suite to run these.

Some TFCs go on to seek firearms training before pursuing an armed inspector role (TJ1).

Period of Posting – 2 Years

Shift Pattern – MPS Standard 12-hour Pattern (Days/Nights 7-7)

Eligibility – Substantive Detective Inspector or those on the select list awaiting promotion with a background in strong decision making.

Applicants please note: this is a uniformed role.

Police (non-Detective) Inspectors are eligible to apply for this role via 18063 MO19 Specialist Firearms Command - Tactical Firearms Commander Inspector (UNARMED). Candidates must ensure they apply for the correct role profile or OLEEO will auto-reject the application.

MO19 TFC Expos – Prior to the closing date of this advertisement, two Teams meetings will be held with a short presentation and the opportunity to ask questions from current TFCs. There is no requirement to attend these sessions and only one is required if of interest.

1600 – Friday 4th October 2024 – Join the meeting now

1600 – Monday 7th October 2024 - Join the meeting now

If you wish to attend but cannot make either, please email **A/CI Benjamin Page – MO19**

Reports To: Chief Inspector James Fishwick / A/Chief Inspector Benjamin Page

To apply – Please provide a personal statement of professional background/bio to also include –

- Why you wish to apply for the role
- What qualities you feel you would bring as a Tactical Firearms Commander

Please limit the statement to a maximum of 500 words.

Results of the initial sift will be provided to candidates on **Friday 8th November 2024.**

Post anonymised paper sift – Selected candidates will be invited to an NDM workshop explaining the next steps with a mini-paper feed walkthrough with current TFCs. This workshop will give candidates a greater understanding of the upcoming assessment. The date will be confirmed post-sift but to aid your own schedules, they are provisionally set for **Thursday 14th November 2024 and Tuesday 19th November 2024 – 1030 – 1300** at Briefing Room Lambeth SOR.

Assessment – Candidates will be invited to MO19 HQ, Leman Street, E1 for an interview and NON-FIREARMS assessment between **Monday 25th November 2024 – Friday 6th December 2024.**

- The interview will consist of evidence-based rear facing questions on three CVF/MPS Values
- Courage
- We Analyse Critically
- We take Ownership
- No additional training is required for the assessment and the decision making shown by way of an across the table paper feed will be within the gift of a currently competent officer holding the rank of inspector.

Successful candidates will be informed on **Monday 9th December 2024.**

Vacancies – there are 5 foreseeable vacancies plus a select list – this includes Police Inspector candidates from the separate vacancy.

Salary

Existing Detective Inspectors will retain their current salary point on appointment to this role. Please refer to PeoplePages for further information.

If you have any queries in respect of this opportunity, or need support in applying, please contact the Met's Recruitment Team at Enquiries.PoliceJobs@police.sscl.com or by telephone to 01633 632500. The team are available Monday to Friday, 8:00am to 10:00pm (excluding Bank Holidays).

We view diversity as fundamental to our success. To tackle today's complex policing challenges, we need a workforce made up from all of London's communities. Applications from across the community are therefore essential.

As a Disability Confident Committed Employer the Met have committed to ensuring that disabled people and those with long term health conditions have the opportunities to fulfil their potential and realise their aspirations.

Essential For The Role

Essential Criteria:

- Recent operational / investigative background
- Proven experience of decision making during critical / major incidents
- Effective IT competence
- Strong leadership and understanding of wider policing landscape
- Positive approach to flexibility to meet demand

Desirable Criteria:

- Willing to be MV/SC vetted
- Operational knowledge of CAD

Overview

Microsoft’s Cloud business is experiencing explosive growth, and the Cloud Supply Chain (CSCP) organization is responsible for enabling the infrastructure underlying this growth. Our mission is to deliver the world’s computer with an industry-leading supply chain. CSCP is responsible for strategic sourcing, customer demand forecasting, capacity planning and management, supply chain planning and execution, capacity provisioning, and decommissioning and dispositioning of datacenter assets worldwide.

We are looking for a talented Director of Network Supply Chain to help build sustainable advantages through the supply chain. Cloud Sourcing, Spares, Sustainability & Security (CS4) organization within CSCP manages sourcing and supply of IT hardware for the data centers. Well-defined and executed sourcing and supply chain management ensures reliable on-time performance, optimized cost, prevents urgent and unplanned investments, and provides accurate and timely information across the supply base and internally across the infrastructure organization. Our focus is on smart growth, high efficiency, and delivering a trusted experience to customers and partners worldwide.

Microsoft’s mission is to empower every person and every organization on the planet to achieve more. As employees we come together with a growth mindset, innovate to empower others, and collaborate to realize our shared goals. Each day we build on our values of respect, integrity, and accountability to create a culture of inclusion where everyone can thrive at work and beyond.

Qualifications

Required Qualifications

- Bachelor's Degree in Engineering, Industrial Engineering, Supply Chain Management, Operations Management, Supply Chain Analytics, or related field AND 10+ years supply planning, operations, supply chain, indirect supply planning, technology-related supply chain, sourcing and manufacturing, or related experience
    - OR Master's Degree in Engineering, Industrial Engineering, Business, Supply Chain Management, Operations Management, Supply Chain Analytics, or related field AND 8+ years supply planning, operations, supply chain, indirect supply planning, technology-related supply chain, sourcing and manufacturing, or related experience
    - OR equivalent experience.

- Experience in leading cross functional teams.
- Knowledge of Datacenter and/or Cloud infrastructure.

Other Requirements:
Ability to meet Microsoft, customer and/or government security screening requirements are required for this role. These requirements include but are not limited to the following specialized security screenings: Microsoft Cloud Background Check: This position will be required to pass the Microsoft Cloud background check upon hire/transfer and every two years thereafter.

Preferred Qualifications

- Good communication and synthesizing skills of both written and verbal.
- Influencing skills and ability to build lasting relationships across multiple layers in the organization.
- Extensive knowledge of 3PL management and supply chain.
- Demonstrated track record in supplier negotiation and management.

Supply Planning M6 - The typical base pay range for this role across the U.S. is USD $129,200 - $273,400 per year. There is a different range applicable to specific work locations, within the San Francisco Bay area and New York City metropolitan area, and the base pay range for this role in those locations is USD $162,000 - $299,400 per year.

Certain roles may be eligible for benefits and other compensation. Find additional benefits and pay information here:

Job Title: Programme Management Office Administrator

Salary: The starting salary is £33,348 which includes allowances totalling £2,841.

The salary is broken down as £30,507 basic salary, which will increase annually until you reach the top of the scale £32,639 Plus, a location allowance of £1,841 and a non-pensionable allowance of £1,000.

Location: Sidcup

This is an exciting new role to work in the Real Estate Development Programme Management Office in supporting the team in the efficiency, governance, and successful delivery of projects.

The Real Estate Development team is made up of engineers, surveyors and project leads who are responsible for the day-to-day delivery of the construction, M+E and energy aspects of the Metropolitan Police Service (MPS) Estates Strategy.

The PMO key tasks and processes are to ensure the department has a centralised team to assist in maintaining accurate records for each project and be a key point of contact for costs, governance and documentation.

Key tasks will include:

- Support in aligning tasks on a Project Management System, including managing monthly journals, accruals, purchase orders, and ad-hoc queries.
- Assist with benchmarking data for RED projects to ensure effective decision-making as an intelligent client.
- Aid in streamlining processes such as invoice receipting, purchase orders, change control, approvals, project creations, and budget management across functions.
- Assist in determining the future direction and workload, ensuring proper authorizations by the Director and maintaining a log for governance.
- Guide project leads in managing projects effectively from initiation to closure, including accurate accounting of costs and actuals.
- Ensure monthly updates to cost forecasts, error management, and data cleansing for accurate Capital Plan data.
- Lead on all Change Control and Requests, verifying changes, seeking approvals, and maintaining accurate logs and records for governance.
- Collaborate with Project Leads to establish procedures and best practices for

smooth project and programme operations within RED.

How to apply

Click the apply now button below and start your career at the Met. Applications will be via an online application form.

Completed applications must be submitted by 23:55 on 31st October 2024.

www.metpolicecareers.co.uk

Essential For The Role

The successful candidate will need to have a clear understanding of a PMO role and the Project Management systems and processes.

The fundamental part of the role will be working with a wide range of Project Leads with varied approaches and experience therefore excellent stakeholder management skills are critical. The Real Estate Development team are continuously driving process improvement therefore the successful candidate will be a driven individual who has experience in identifying and improving these PMO practices.

- Work experience as a Project Administrator, Project Support, back office function or bookkeeping.
- Project Management system experience
- Strong IT skills – Excel advanced
- Process building and organising systems – process mapping, identifying change to drive improvement
- Demonstrable experience of working in a fast paced complex project environment
- Solid organisation and time-management skills

Job Title: Experienced Intelligence Analyst

Salary: £34,448 to £36,864 basic salary plus an annual pensionable location allowance of £1,841, a non-pensionable allowance of £1,000. Progress to the band maximum will be via annual incremental progression. An additional Market Rate Allowance of £3000 p/a is available for applicants who either already have or are willing to work towards their IPP in Intelligence Analysis and continue to maintain their accreditation.

Certain positions, but not all, will attract an additional 12.5% Shift Disturbance

Allowance. Allocation of these posts are dependent on vacancies and your previous experience.

Location: Multiple locations across London

Not all clues are obvious. Not all information is evident

The threats facing London are constant and ever-evolving. Emerging technologies and a growing population make the risks greater than ever.

That’s why we need Experienced Intelligence Analysts. We’re looking for people who are already skilled in spotting those clues that aren’t obvious to others, that understand how to assess the threat, realise not everything is what it seems and know that not all weapons look the same.

As the world’s leading police service, we investigate some of the most complex, high-profile cases anywhere and to do this well, we have one of the largest Intelligence Analysis professions in the UK. You’ll join our investigative and operational analytical teams and start identifying connections in information and developing intelligence to tackle organised crime. It’s about collecting, exploiting, assessing and interpreting a range of overt and covert information sources and delivering valuable, influential analysis to tackle threat, risk and harm in London.

You’ll be working on critical and high-risk incidents so you must have proven experience in intelligence analysis. Ideally, you’ll have gained this in Law Enforcement, Government, the Military, Financial or Security sector. You’ll also have completed an accredited Intelligence Analyst Training course or have experience within the Professional Heads of Intelligence Assessment (PHIA) community.

Duties and responsibilities

Your flexibility and creativity are key, as is a keen interest in large data sets and overlaying contradictory information to make sense of complex issues. You’ll play a vital role in a multi-faceted team, responding efficiently and effectively to the changing requirements of each day; you’ll enjoy collaborating and negotiating outcomes, plus a talent for communicating clearly and succinctly is vital. As a natural problem-solver, you’ll prioritise and identify issues a make quick, sound decisions for Senior Leaders

Crucially, you’ll be someone who can build the bigger picture from the tiny nuggets of intelligence you’ll unearth. The closer you can focus on the fine details, the sooner you’ll unlock the data that locks criminals away and the better we’ll protect over eight million people.

Key Tasks

What does the average day look like? Your core duties will include:

- Utilising a range of analytical techniques to provide insight into themes and trends across crime types, identifying current, evolving and emerging threat, risk and harm
- Compiling analytical products from a range of sources; identifying and interpreting intelligence gaps, drawing inferences and generating

recommendations to support decision making on a tactical and strategic level
- Negotiating terms of reference with customers to ensure that the product meets their needs
- Producing written or verbal briefings to stakeholders to provide a clear and concise evidence-based understanding of the subject matter
- Monitoring and evaluating the significance of patterns and trends relating to crime and offenders in support of decision making around prioritisation and resource allocation
- Collaborating with both internal and external partners to ensure access to a rich intelligence source to develop a greater understanding of the crime picture
- Preparing and presenting analytical products for use in court proceedings, as required
- Adhering to all legal frameworks, key working principles, polices and guidance relevant to the role
- Maintaining flexibility to support corporate initiatives and critical operations as required, which may involve working from alternate locations and outside existing responsibilities

Please click on the below link to view an online candidate information pack that will you give you an insight into the Met, the competency framework we use which shapes our daily work behaviours, the application process, and a host of other information, that will help inform and support your application:

https://sscl-innovation.com/MPScandidatepack/

Application Process:

Please provide the following three submissions:

- A CV detailing your previous experience and relevant skills
- Personal statement outlining why you are applying for this particular role and what you could bring to the organisation (no more than one side of A4)
- A two page document detailing one piece of work that demonstrates your experience and suitability for this role.

www.metpolicecareers.co.uk

Essential For The Role

What are we looking for?

Essential Criteria

- Experience – Proven experience of working in Intelligence Analysis or

Intelligence Assessment (Military, Government, PHIA community, Law Enforcement, Financial or Security Services)
- Training – Successful completion of an accredited Intelligence Analyst Training Course, Structured Analytical Techniques and sound knowledge of the National Intelligence Model
- Analytical thinking skills - A creative, open-minded problem solver with a passion for working in policing and intelligence
- Communication Skills – A strong ability to present your work in a clear and concise written format, as well as deliver your findings verbally to a variety of audiences
- IT Literacy - Excellent IT skills, including a high level of experience and interest in working with Microsoft Excel, Word and PowerPoint
- Honesty and Integrity - The ability to maintain the highest levels of integrity, discretion and confidentiality and handle sensitive information appropriately
- Strong Interpersonal skills - The ability to build and maintain effective relationships with staff and officers of all levels, as well as external partners, promoting a positive and professional image of the MPS
- Initiative -The capability to use your own initiative, manage your own workload but also work as part of a team
- Flexibility - A flexible approach to working hours and locations where business need dictates
- Adaptability - The ability to work within a fast-paced environment with competing priorities
- Interested in Personal Development - You must currently hold GCSE Maths and English Grade C and above (or equivalent and be able provide certification) and be excited about undertaking additional learning on the job

Desirable Criteria

- Experience with Communications Data Analysis
- Ability to produce work to an evidential standard
- Experience of giving evidence in court

If you’re excited about this role but your experience doesn’t align perfectly we do also have Foundation Level Analyst Positions. Please see the Met Careers Website for further details on current recruitment opportunities.

Additional information

- If it is not held already, successful applicants will be expected to achieve and maintain the Intelligence Professionalisation Programme (IPP) certification for Analysts.

- The offer of employment is subject to successful completion of our vetting processes
- Applicants should also be aware of the need to sign a confidentiality agreement on taking up the post
- Whilst we have an operational business requirement and this is an office based role, we are currently able to offer blended working in most teams

Benefits

You'll also enjoy the kind of great benefits that you'd expect from one of London's largest employers.

These include;

- Annual leave entitlement of 28 days plus bank holidays, rising to 33 days after 5 years of service
- Civil service pension arrangements
- IPP Accreditation
- Interest free season ticket loans
- Membership of Met sports and social clubs
- Flexible working conditions and many more.

Application Process:

Please provide the following three submissions:

- A CV detailing your previous experience and relevant skills
- Personal statement outlining why you are applying for this particular role and what you could bring to the organisation (no more than one side of A4)
- A two page document detailing one piece of work that demonstrates your experience and suitability for this role.

MO2 Met Intelligence aims to create an inclusive and welcoming atmosphere for all staff. A working environment where any group or individual can be and feel respected, supported and valued to fully participate and contribute to the Metropolitan Police mission of "Working to keep London safe for everyone".

Inclusion, diversity and equality is central to our approach in making Met

Intelligence more representative of the communities we serve. We view diversity as fundamental to our success. Effective local policing relies upon strong intelligence support from our public and across all our communities; applications from across all communities are therefore essential and encouraged.

Disability Confident Statement

The Met is committed to being an equitable (fair and impartial) and inclusive employer for disabled people, striving to have a diverse and representative workforce at all levels. We encourage applications from people from the widest possible range of backgrounds, cultures and experiences. We particularly welcome applications from people with disabilities and long-term conditions, ethnic minority groups and women.

As a Disability Confident employer, the Met has committed to making disability equality part of our everyday practice. We ensure that people with disabilities and those with long term conditions have the opportunities to fulfil their potential and realise their aspirations.

The Met is committed to making reasonable adjustments to the recruitment process to ensure disabled applicants can perform at their best. If you need any reasonable adjustments or changes to the application and recruitment process, we ask that you include this information within your application form. All matters will be treated in strict confidence.

Please note, if you are applying for a police officer role or to become a police community support officer (PCSO) or designated detention officer (DDO), there is a minimum requirement that you must pass a job-related fitness test (JRFT) at point of entry. This does not apply to police staff roles. Find out more about police fitness

standards.

Regular Collaboration is required with;

- BCU Public Protection DI's
- File Quality Team & FLP Analysts
- Volume peers within CMT
- MPS Disclosure Advisors.
- CPS data team

The role will also include:

- Implementation/monitoring/review of ongoing CJ improvement plans to improve case file quality, as per the Directors Guidance Assessment.
- Liaison and attendance at meetings with internal & external stakeholders. This will include representing the CMT SLT at BCU performance and compliance meetings attended by BCU Commanders, CJ leads and external Criminal Justice agencies such as Crown Prosecution Service and HM Courts

service.

- Effective monitoring of workloads at different levels. There is a need for an understanding of data both to review & provide valuable feedback to the team and the officers submitting files through the unit. There will also be a request from CPS for some of the data kept by the CMT to trace files and progress.
- Ensuring appropriate documenting & record keeping – ensure the RASSO CMT TEAM are delivering & achieving their required standard whilst maintaining high standards of professionalism through effective monitoring and leadership.
- Ensure adequate records of performance are kept and interrogated regularly both for SLT Briefings and for presentations such as monthly RASSO JOIM. This may also involve addressing high level disputes over CMT Decisions.
- Assisting (where required) with the provision of case file guidance and training both internally and externally to ensure case files comply with DG6.
- For further information please contact C/Insp Duane Barrett (MO10) or Band B Alan Catlin (MO10).

Salary

Existing Inspectors will retain their current salary point on appointment to this role. Please refer to PeoplePages for further information.

If you have any queries in respect of this opportunity, or need support in applying, please contact the Met's Recruitment Team at Enquiries.PoliceJobs@police.sscl.com or by telephone to 01633 632500. The team are available Monday to Friday, 8:00am to 10:00pm (excluding Bank Holidays).

We view diversity as fundamental to our success. To tackle today’s complex policing challenges, we need a workforce made up from all of London’s communities. Applications from across the community are therefore essential.

As a Disability Confident Committed Employer the Met have committed to ensuring that disabled people and those with long term health conditions have the opportunities to fulfil their potential and realise their aspirations.

Essential For The Role

Essential Criteria / Knowledge:

- Candidates must have excellent communication and engagement skills and be able to lead and motivate teams working across a wide geographical area. Good organisation, planning, and team working skills.

- Good working knowledge of all elements of CONNECT case file build and effective written and verbal communication.
- Experience of the Postal Charging Requisition process (PCR) , Obtaining pre-charge CPS advice and a good knowledge of both CMT and MPS CJ process and structures
- Ability to work to deadlines with minimal supervision and evidence of ethically sound decision making.
- Experience in PIP Level 2 investigations, serious and complex investigations preferably within Public Protection / RASSO arena. A safeguarding background would be an advantage but not essential. An ability and desire to Build strong relationships with the BCU's to whom we support along with our trusted partners CPS are key.
- Good understanding of DG6, CPIA, Attorney General guidelines, Code for crown prosecutors and disclosure obligations
- Good working knowledge of Excel (or willing to extend current knowledge), analysing data sets to identify relevant trends and opportunities.

Role Requirements: Please evidence the following three drivers from the Competency and value Framework (CVF) under the following three level 2 competencies;

- We are Collaborative
- We have Integrity
- We are Innovative and open minded.

Reports To
Chief Inspector Duane Barrett

Brief description

The main purpose of this position is to design, implement and manage cloud infrastructure solutions and services within the South African Reserve Bank (SARB) Group.

Detailed description

The successful candidate will be responsible for the following key performance areas:

- Design and build cloud-based infrastructure solutions and services that align with the SARB's requirements.
- Implement cloud infrastructure designs and ensure alignment with defined architecture.
- Provide expert guidance on cloud adoption and cloud cost management strategies.
- Manage the cloud technology life cycle.
- Ensure that cloud-based infrastructure solutions adhere to the governance and security model for the cloud as developed by the SARB's Cyber and Information Security Unit (CISU).
- Develop, maintain and document technical standards, user guides, standard operating procedures (SOPs), instructional documents etc. relating to cloud infrastructure solutions.
- Collaborate and engage with internal and external stakeholders to ensure the functionality of the deployed cloud infrastructure solutions and technologies.
- Identify, address and remediate risks in the cloud environment as identified by auditors and governance-related assessments.
- Stay abreast of new developments in cloud architectures and technologies.
- Provide cloud engineering expertise on information and communication technology (ICT) infrastructure projects, and participate in other SARB Group projects to contribute towards business objectives.
- Take responsibility for infrastructure capacity planning, disaster recovery and resource allocation to ensure optimal performance, continuity and scalability.

Qualifications

Job requirements

To be considered for this position, candidates must be in possession of:

- the minimum of a Bachelor's degree (NQF 7) in Information Technology (IT) or Computer Science, or an equivalent qualification
- a minimum of 5-7 years' experience in cloud infrastructure engineering with a strong track record of designing and implementing cloud infrastructure solutions in enterprise organisations;
- being an AWS Certified Cloud Practitioner;
- being a Microsoft Certified Azure Administrator Associate; and/or
- being a GCP Associate Cloud Engineer.

The following would be an added advantage:

- ITIL v3/4; and/or
- COBIT 2019.

Additional requirements include:

- industry, organisational and business awareness and knowledge;
- quality assurance knowledge and skills;
- excellent technical knowledge of cloud services;
- continuous improvement of cloud services;
- comprehensive hands-on cloud services troubleshooting experience;
- continued learning and/or professional development;
- the ability to read and understand technical manuals, procedural documentation and … (OEM) guides;
- the ability to liaise with external service providers for the purpose of product and technology reviews, coordinating vendor presentations (where relevant);
- understanding the goals and objectives of the SARB's Business Solutions and Technology Department (BSTD);
- understanding critical IT processes (incident, configuration and change management) and other technical procedures;
- effective communication;
- impact and influence;
- conceptual thinking;
- managing complexity and ambiguity;
- innovation and creative thinking;
- building and managing relationships;
- strategic thinking;
- a customer and stakeholder focus;
- experience working in a team-oriented, collaborative environment;
- the ability to prioritise and execute tasks in a high-pressure environment;
- judgement and decision making;
- analysis and problem solving;
- resilience and adaptation;
- a service and stakeholder focus;
- time and project management; and
- the ability to function independently (being a self-starter).

In line with the SARB's commitment to diversifying its workforce, preference will be given to suitable candidates from designated groups. People with disabilities are welcome to apply.

The SARB offers remuneration and benefits commensurate with the level of the position and in line with the market. The level at which

the successful applicant will be appointed will depend on his/her competence and experience.

About Us

About SARB

Primary mandate of the SARB

Section 224 of the Constitution of South Africa states the mandate of the SARB as follows:

The primary object of the South African Reserve Bank is to protect the value of the currency in the interest of balanced and sustainable economic growth in the Republic.

(557) End-User Computing Architect - BSTD

Pretoria, South Africa

Job Description

Brief description

The main purpose of this position is to research, plan, architect, design, maintain and oversee the deployment of end-user computing architectures within the South African Reserve Bank (SARB) Group.

Detailed description

The successful candidate will be responsible for the following key performance areas:

- Research and recommend emerging and fit-for-purpose end-user computing solutions and participate in the procurement of such solutions aligned to the business strategy.
- Define and evolve the SARB Group's end-user computing in alignment with the to-be architecture.
- Plan and develop end-user computing architecture blueprints and roadmaps for end-user solutions in alignment with industry best practices and standards.

- Oversee the implementation of end-user computing solutions and ensure alignment with defined architecture.
- Provide expert guidance on the adoption of end-user computing solutions.
- Provide expert guidance on cost management strategies for end-user computing solutions.
- Oversee the management of the end-user computing solutions life cycle.
- Lead the design of end-user computing solutions to ensure alignment with defined architectures.
- Implement and maintain the governance and security model for end-user computing as developed by the Cyber and Information Security Unit.
- Develop, maintain and document technical standards, procedures, user guides, standard operating procedures and instructional documents relating to the end-user computing solutions.
- Collaborate and engage with internal and external stakeholders to ensure the functionality of the deployed end-user computing solutions and technologies.
- Identify, address and remediate risks in the end-user computing environment as identified by auditors and governance-related assessments.
- Stay abreast of new developments in end-user computing architectures and technologies.
- Provide end-user computing architectural expertise with respect to information and communication technology (ICT) projects and participate in other SARB Group projects to contribute towards business objectives.
- Manage capacity planning, disaster recovery and resource allocation to ensure optimal performance, continuity, and scalability as it relates to end-user computing.

Qualifications

Job requirements

To be considered for this position, candidates must be in possession of:

- a minimum of an Honours degree (NQF 8) in Information Technology, Computer Science or an equivalent qualification;
- a minimum of 8 to 10 years’ experience in end-user computing architecture with a strong track record of designing and implementing end-user computing solutions in enterprise organisations;
- a TOGAF certification.

The following would be an added advantage:

- ITIL v3/4 and COBIT 2019 certifications;
- certified AWS Certified Solutions Architect; and
- certified Microsoft Certified: Azure Solutions Architect.

Additional requirements include:

- industry, organisational and business awareness knowledge;

- quality assurance knowledge and skills;
- excellent technical knowledge of cloud services;
- continuous improvement of cloud services;
- comprehensive hands-on cloud services troubleshooting experience;
- continuous learning and/or professional development;
- ability to read and understand technical manuals, procedural documentation and original equipment manufacturer (OEM) guides;
- liaising with external services providers for purposes of product and technology review, and coordinating vendor presentations where relevant; and
- an understanding of the department’s goals and objectives.

In line with the SARB’s commitment to diversifying its workforce, preference will be given to suitable candidates from designated groups. People with disabilities are welcome to apply.

The SARB offers remuneration and benefits commensurate with the level of the position and in line with the market. The level at which the successful applicant will be appointed will depend on his/her competence and experience.

About Us

About SARB

Primary mandate of the SARB

Section 224 of the Constitution of South Africa states the mandate of the SARB as follows:

The primary object of the South African Reserve Bank is to protect the value of the currency in the interest of balanced and sustainable economic growth in the Republic.

The South African Reserve Bank, in support of its primary objective, must perform its functions independently and without fear, favour or prejudice.

WHAT WE DO

Monetary Policy

The Constitution gives the SARB the mandate to protect the value of the rand. We use interest rates to keep inflation low and steady.

Financial Stability

The SARB has a mandate to protect and enhance financial stability. We identify and mitigate systemic risks that might disrupt the financial system.

Prudential Regulation

Job Description

Brief description

The main purpose of this position is to provide end-to-end business analysis and quality testing services to the South African Reserve Bank's (SARB) Corporation for Deposit Insurance applications, with a focus on business analysis, quality assurance, solutions testing and general business solution support.

Detailed description

The successful candidate will be responsible for the following key performance areas:

- Plan and execute business analysis and quality testing activities.
- Facilitate workshops and consult with business owners and other stakeholders to understand business objectives, drivers, functions and structures as well as to identify business requirements.
- Review business processes and procedures, analyse business requirements/needs and associated data, and identify possible solutions.
- Analyse the feasible solution options, recommend viable solutions, validate these with stakeholders, and develop the supporting business cases.

- Manage stakeholder relationships to ensure the delivery of high-quality service and fit-for-purpose solutions.
- Develop systems training material and training plans and present training courses in support of new application functions.
- Consult with business and technical stakeholders to elicit, analyse, communicate, document and validate requirements for changes to business processes or systems requirements.
- Participate in the creation, maintenance and execution of testing and quality plans, and application benchmarks to ensure the correct product testing approach.
- Develop progress and quality reports (encapsulating test results and statistics) to support the final approval for the implementation of the solution.
- Help identify likely product quality problems ahead of time and assist in potential requirement and process changes.
- Stay abreast of changes to analytical tools and methodologies and identify opportunities to improve and standardise work processes and apply these in the course of own work.

Qualifications

Job requirements

To be considered for this position, candidates must be in possession of:

- a Bachelor’s degree (NQF 7) in Information Technology (IT) or an equivalent qualification;
- a relevant Business Analysis certificate;
- five to eight years’ experience within the business analysis environment; and
- at least three years’ experience in test analysis and execution.

The following would be an added advantage:

- an International Software Testing Qualifications Board (ISTQB) foundation certificate would be an added advantage.

Additional requirements include:

- knowledge and skill in:
- industry, organisational and business awareness;
- quality assurance;
- continuous improvement;
- continued learning and professional development;
- business analysis practices, methodologies and tools; and

- IT enablement legislation and governance, risk and compliance.

In line with the SARB's commitment to diversifying its workforce, preference will be given to suitable candidates from designated groups. People with disabilities are welcome to apply.

The SARB offers remuneration and benefits commensurate with the level of the position and in line with the market. The level at which the successful applicant will be appointed will depend on his/her competence and experience.

About Us

About SARB

Primary mandate of the SARB

Brief description

The main purpose of this position is to collect, collate, integrate and provide data for reporting and business intelligence purposes as well as provide administrative support, as required, for the change function.

Detailed description

The successful candidate will be responsible for the following key performance areas:

- Define, collect and collate data through various instruments (e.g. surveys, system solution, dashboard, etc.), ensuring data integrity, accuracy and consistency for informed and timeous decision-making.
- Integrate and provide data in an appropriate format from multiple sources for business intelligence, insights and reporting purposes.
- Identify gaps in data collection, raise risks and suggest mitigating solutions.
- Collect and collate data and information for various reports on projects, programs and portfolios, which include progress against objectives, risks, issues and mitigations.
- Provide administrative support, including procurement, diary scheduling, interview process, survey administration and so on for the change function.
- Be responsible for data storage and governance in a central repository to ensure accessibility.

- Manage and maintain stakeholder relationships to solicit information and data for reporting purposes.
- Proactively stay abreast of developments and broaden own knowledge of change management and data management to ensure the adherence to best practice and industry standards.

Qualifications

Job requirements

To be considered for this position, candidates must be in possession of:

- a minimum of a National Diploma (NQF 6) or an equivalent qualification;
- a minimum of five to seven years' data and administration management experience; and
- experience in a change management and project management area will be an added advantage.

Additional requirements include:

- knowledge and skills in:
- industry, business and organisational awareness;
- quality assurance;
- continuous improvement;
- continued learning/professional development;
- business intelligence;
- IT enablement information management;
- IT enablement reporting;
- database administration; and
- IT enablement strategy;
- conceptual thinking;
- analysing and problem solving;
- verbal and written communication;
- stakeholder and client focus;
- impact and influence;
- drive for results;
- attention to detail; and
- judgement.

In line with the SARB's commitment to diversifying its workforce, preference will be given to suitable candidates from designated groups. People with disabilities are welcome to apply.

The SARB offers remuneration and benefits commensurate with the level of the position and in line with the market. The level at which the successful applicant will be appointed will depend on his/her competence and experience.

Eaton’s ADMIN Administrative division is currently seeking a Engineering Supervisor (Welding).

What you’ll do:

PRIMARY FUNCTION:

Design and implement processes in welding operations that can achieve the levels of required quality, customer service and manufacturing, providing technical support to maintain and improve the efficiency and productivity levels desired by the implementation of the Eaton Business System Tools.

ESSENTIAL FUNCTIONS:

1. Provide resources and continuous improvements to manufacturing processes.
2. Correct and prevent manufacturing problems related to the process and productivity.
3. Follow up, improve and monitor metrics or capacity measures, such as Yield, Scrap, Productivity, Efficiency.
4. Monitor and control flow of production processes through the development and implementation of the EBS tools.
5. Determine the man-load for the welding operations lines and provide the equipment, machine and tools required on demand.
6. Design the manufacturing systems Lay-Out.
7. Develop and implement programs to reduce costs and increase efficiency of productivity.
8. Analyze customer complaints and develop corrective action plan.
9. Monitor and implement quality standards based on EQS to ensure the certification of standard.
10. Analize and evaluate capital cost metrics: Scrap, rework, etc.
11. Provide training and coordination to the engineering assistants/co-op assigned to the welding operation.
12. Design manufacturing instruction and develop new process in order to provide work procedure and support the goals achievement.
13. Perform an active participation in the Departmental Teams.
14. Develop and design welder operations and tooling for new product introduction and / or changes (PRO launch projects)
15. Develop capital projects appropriations.
16. Update PFMEA tools and Control Plans with unusual conditions of the production process, as specified by the EQS.

17.Mantain monthly updated of VSM, Standard Work and Error Proofing tools.
18.Responsible for TPM and SUR ELSS tools for welding operations.
19.Follow up the Implementation of ECN'S (Engineering Change Notice) aplicable to their areas.
20.Responsible for technical personnel for welding operations (Setups & process technicians)
21.Plan, create and implement preventive maintenance for welding machines and operations.
Generate and follow-up spare parts purchase orders for welding equipment's

22. Monitor all set-up functions to comply with electrical safety, machine guarding, hot work and any other safety procedure applicable (such Omron, ENHESA, NFPA, OSHA, and others)

23. Active participation to troubleshoot and implement actions to eliminate holds related to welded assemblies (UL, 3rd party or internal)

Qualifications:

SPECIALIZED KNOWLEDGE:

1. Bachelor degree of Industrial, Electromechanical or Electrical Engineer.
2. Minimum experience of 3 years in similar positions.
3. Full Bilingual (English / Spanish)
4. PC knowledge: Auto Cad, Minitab and Microsoft Office. Preferred Power BI.
5. Interpretation of design knowledge
6. Knowledge SPC (Statistical Process Control), Lean Manufacturing, Greenbelt, Lead Auditor ISO9000.
7. Knowledge of project management and problem-solving techniques.
8. Competencies: Builds Organizational Capability, Thinks & Acts Strategically and Gets Results

9. Preferred Knowledge of Principles and Electrical Safety

We are committed to ensuring equal employment opportunities for job applicants and employees. Our recruitment processes use balanced selection criteria and avoid unlawful discrimination against applicants on the basis of their age, colour, disability, marital status, national origin,

gender, gender identity, genetic information, race or racial origin, religion, sexual orientation or any other status protected or required by law.

Engineering Manager - Power Electronics CoE

Job Location

Titchfield, GBR, PO14 4QA

Work Type

Hybrid

Department

ENG

Join Eaton and be a part of our commitment to providing impactful, energy-efficient solutions that shape a sustainable future. At Eaton, we make what matters work, and we're dedicated to fostering a workplace where ethics, inclusion, diversity, and our people are at the forefront.

Eaton is seeking an experienced **Engineering Manager** for the Power Electronics (PE) Center of Excellence (CoE) team located in Titchfield, UK. The ideal candidate for this role would be a technically adept engineer with leadership qualities who is capable of inspiring a cross-functional team and forging strong connections with international colleagues.

Eaton’s Power Electronics CoE accelerates the company’s growth through the development of power electronics technology, platforms, and common

building blocks that are scalable, cost-effective, and manufacturable, as well as standardized design methodologies that can be adopted by multiple business units, which provide a foundation for our business to more rapidly develop innovative products.

What you'll do:

- Lead and direct a team of engineers and projects to achieve stated goals and objectives
- Monitor and report on the overall performance of a team and projects. Creates a performance-based culture, encouraging the team to develop measurable goals and objectives that support CoE strategies.
- Coach and mentor team members and strengthen the technical capability of the team
- Supports the CoE Director to develop strategy, direction, and priorities. Creates action plans to drive strategies to realization.
- Supports the CoE Director and Business Unit (BU) engineering leaders in the development of technology roadmaps, project pipelines, detailed project plans, and value proposition
- Initiates and develops solid relationships with both engineering and business leaders within Eaton to drive the adoption of new technology, common platforms/designs, and state-of-the-art design methodologies.
- Drives engineering excellence both in CoE and the BU's teams.

Qualifications:

- BS in electrical engineering or mechanical engineering or equivalent.
- Minimum 10 years of related engineering experience in electronics designs, and electronics product development and qualification, including electrical aspects.

- Minimum 3 years of experience in leading people
- Proven track record of leadership skills and technical capability
- Experience in project management
- Customer-focused with good relationship-building and communication skills
- Ability to learn new skills, knowledge, industry, or products

Preferred Qualifications:

- Hands-on experience in electronics designs and product development, especially power electronics for safety critical applications, including aerospace application

- Broad knowledge of power electronics designs including topology, analog/digital circuits, thermal management, control, and firmware
- Understanding of compliance standards, including MIL standards
- Experience working in diverse cultural situations with global customers and team members
- Demonstrated knowledge of engineering processes
- Design for Six Sigma certification

Skills:

- Self-motivated and goal-oriented individual.
- Good communication and presentation skills
- Collaborative orientation, the ability to succeed in a highly team-oriented, global, and diverse environment.
- Consistently acts in an ethical, open, honest, trustworthy, and truthful manner.
- Desire for innovation, new product development, program management … to make what matters work!
- Position requires up to 15% travel domestically and internationally.

What we offer to you:

- Competitive compensation and benefits package
- Challenging projects in dynamic collaborative team
- Flexible working solutions (flexible working hours, compressed week etc.)
- We make your aspirations matter – Eaton encourages internal promotion, whenever possible
- We make your growth matter - We invest in our employees for the long term – not just with salary and benefits, but with ongoing learning and development opportunities made available through Eaton University
- We make your contributions matter - reliability, safety, efficiency, and sustainability are at the core of our dedication to improving people’s lives and the environment through power management technologies.
- We make your well-being matter – We put your health and safety first. Wellness at Eaton is more than a program, it’s about changing the environment by offering the right tools to help empower employees to make that happen

The successful applicant will be in contact with US ITAR controlled technology, goods and information. As a condition of employment,

employees with access to US ITAR controlled technology and goods may be required to undergo an additional screening process as part of the recruitment process.

We are committed to ensuring equal employment opportunities for job applicants and employees. Our recruitment processes use balanced selection criteria and avoid unlawful discrimination against applicants on the basis of their age, colour, disability, marital status, national origin, gender, gender identity, genetic information, race or racial origin, religion, sexual orientation or any other status protected or required by law.
